

# INTRODUCING!

## Auto Dry™

Cravo's Automated Retractable Rain Shelters  
PATENT PENDING

Automatically protect crops in minutes from frost, rain, hail, dew, wind and sunburn!

- Prevent fruit splitting or cracking
- Advance the harvest
- Increase yields and quality
- Reduce labour costs
- Reduce chemical requirements and residues

**Close hectares of roofs in less than 5 minutes!**

Roofs travel in 5m increments but interior posts are spaced 10m apart along the treeline. Optional travel distances are available.

Standard structure is 4.3m tall. Walls can be open or covered with net or motorized roll up curtains

Underview

Standard Rain shelter covering, and optional valley seal offers enhance heat retention.

Topview

One motor can close approximately 5,000m2 in less than 5 minutes

Interior posts are set using screw in augers

Perimeter cable bracing tighteners must be set into concrete

Perimeter and drive system posts are set onto standard stubs set into concrete

Perimeter posts can be set on optional screw in augers
